

Profile: Technical professional seeking a front-end web developer position. Always determined to work to the best of my ability to tackle all problems. With a creative mindset, always brainstorming new ways to approach the overall goal. Proficient in HTML, CSS, JavaScript, jQuery, AJAX, Flexbox, Bootstrap, Tailwind, SASS, React, Node.js, Express, GitHub, SQL, and MySQL.

Education:

Full Stack Web Developer Bootcamp Course (Hofstra University, Hempstead, NY + QuickStart) - June 2021 - January 2022

Learned technologies used in the modern industry including React, Express, Tailwind, etc.

Nassau Community College, Garden City, NY - Associate Degree in Information Technology Received May 2021

Graduated with the Summa Cum Laude honor. Dean's list for four semesters.

Related Experience:

Stock App, Bootcamp Project 4 - DECEMBER 2021

- Utilizes the fetch API to send requests to the Express server.
- Retrieves data from a Yahoo Finance API to get stock data.
- Users can add or sell stock shares in their portfolio.

To-Do List, Bootcamp Project 3 - OCTOBER 2021

- React makes up the majority of this project, utilizing state to hold the to-dos and to track what filter you want to use for the to-dos.
- Contact form uses Formspree.io to send form data.

GIPHY API, Bootcamp Project 2 - AUGUST 2021

- Made use of Bootstrap's cards to display data in an organized and appealing way.
- AJAX sent requests to GIPHY's API to receive the response of the data containing the GIF images.
- Added other options such as limitations and searching for stickers instead to make good use of the GIPHY API.

Magazine Website, Bootcamp Project 1 - JULY 2021

- Made use of Bootstrap and jQuery libraries to make the site visually more attractive and to make some elements like the carousel function properly.
- The contact form used formspree.io, which sent the data from the submission directly to it.
- Flexbox paired with Bootstrap's cards made up the visual appeal of the magazines' page.

GameStop Project, Nassau Community College - MAY 2021

- Utilizes C# and ASP.net.
- Uses image storing and handling
- Connects to a database to store user's contact information and product information.

Additional Employment:

King Kullen, Garden City Park, NY - Cart Attendant FEBRUARY 2019 - PRESENT
